**ABSTRACT**

As the technology is growing immensely in recent years certain improvisation needs to be made in the search of books time in the student life students are tired of searching their books for exam as we are in modern world the technology has developed alot we got something better for them. We will create a website for students that they can collect their e- books easily for their respective subjects. It briefly explain the ideas and content of the e book management system in clear manner.e book is the online platform. It aim to reduce time complexity and searching their books in various websites. It will be easy for them to search a computer based books the entire process of 'issue of books or magazines' is done in a manual manner then it would take several months for the books or magazines to reach the applicant. Considering the fact that the number of students for book bank is increasing every year, an automated system becomes essential to meet the demand. So this system uses several programming and database techniques to elucidate the work involved in this process.
